¹ I use bench decisions to lay out in writing decisions that are too long, or too important, to dictate in open court, but where the circumstances do not permit more leisurely drafting or more extensive or polished discussion. Because they often start as scripts for decisions to be dictated in open court, they typically have a more conversational tone.

ROBERT E. GERBER
UNITED STATES BANKRUPTCY JUDGE:

In this contested matter in the jointly administered chapter 11 cases of Chemtura Chemical Company and its affiliates, the Debtors object to private party claims (the “**Private Party Claims**” and “**Claimants**”)² for future environmental remediation costs also sought by the federal government and certain state governmental entities, under section 502(e)(1)(B) of the Code, which generally disallows claims (1) for reimbursement or contribution (2) by those liable with the debtor (3) to the extent that such claims are contingent.

With two exceptions, I conclude that these claims are of the type for which disallowance is required under section 502(e)(1)(B) and its associated caselaw. Except insofar as the exceptions apply, the Debtors’ objections are sustained. With respect to the exceptions:

(a) where remediation costs were already paid by the claimant and

(b) the claim by the Delaware Sand & Gravel Trust,

the Debtors’ exceptions are overruled.

Findings of Fact³

1. Government Environmental Claims

In October 2009, the United States, on behalf of the United States Environmental Protection Agency (“**EPA**”) and the National Oceanic and Atmospheric Administration (collectively, the “**U.S.**”)⁴ filed proofs of claim against certain of the Debtors asserting, *inter alia*, more than \$2 billion in liabilities for response costs for pursuant to section 107(a) the

² Although the Debtors originally objected to more claims on the same grounds, some have since been resolved, disallowed, or expunged. See Findings of Fact, Section 3. At this point, 29 proofs of claim remain subject to this objection. See n.13 and Appendix B.

³ Pursuant to the parties’ agreement and the provisions of Case Management Order #1, all of the facts (but not necessarily arguments and conclusions) in the declarations submitted to me have been taken as true. To shorten this Decision, I’ve limited factual citations and detail to the most significant matters.

⁴ For the sake of simplicity, I refer to the claims filed by the Federal Agencies as “U.S. claims” or “EPA claims,” and I use the terms “U.S.” and “EPA” interchangeably.

Comprehensive Environmental Response, Compensation, and Liability Act (“**CERCLA**”),⁵ civil penalties, and natural resource damages and assessment. More specifically, the U.S. claims asserted, in part, that certain Debtors are jointly and severally liable, along with other responsible parties, for approximately \$49.6 million in past response costs, an estimated \$2 billion in future response costs, and approximately \$1.2 million in natural resources damages and assessment costs.

Though smaller in dollar amount, similar claims were filed by the state environmental agencies⁶ for the states of California, Connecticut, and Texas, among others.

2. Environmental Settlement Agreement with U.S. and Certain States

Since the briefing and the hearing on these Objections, the status of some of the Debtors’ environmental liabilities has changed.

In September 2010, I approved a settlement agreement among the Debtors, the U.S., and Connecticut, resolving the regulators’ environmental claims and providing funds for future clean-up efforts. That settlement agreement, among other things, provided for:

(1) the allowance of approximately \$16 million in general unsecured claims for the benefit of the U.S. for unreimbursed past and future response costs incurred by the U.S. pursuant to CERCLA section 107(a);

(2) cash payments to the U.S. of approximately \$9 million the U.S. to resolve alleged injunctive obligations at a number of environmental sites;

(3) the allowance of environmental claims of approximately \$830,000 for the benefit of the U.S. for sites still owned or operated by the Debtors; and

⁵ See 42 U.S.C. §§9601 *et seq.*

⁶ For simplicity, going forward, I refer to such claims as simply being asserted by the respective states.

(4) the allowance of environmental claims by Connecticut of about \$1.1 million.

In addition, that settlement agreement provided that other, non-debtor, potentially responsible parties (“**PRPs**”) would receive a reduction in their liability equal to the amounts paid by the Debtors pursuant to the settlement, as provided for by CERCLA. The settlement agreement also contained broad covenants not to sue, and granted the Debtors contribution protection under CERCLA section 113(f)(2) for environmental liabilities resolved by the Agreement.

The implication of the contribution protection in these settlements was that other PRPs with respect to those environmental liabilities would not be able to come after the Debtors for costs of cleanup, because the Debtors would have satisfied their liability on account of the sites addressed in the Agreement.

In addition, I approved settlement agreements between the Debtors and California and Texas with respect to sites for which Private Party Claims at issue here were also filed. Like the U.S. and Connecticut settlement agreement, these settlements provided the Debtors with both covenants not to sue and contribution protection in exchange for allowed environmental claims of fixed amounts (in the case of Texas), or cash payments of fixed amounts (in the case of California).

3. Private Party Environmental Claims

In May 2010, the Debtors objected to 59 Private Party Claims pursuant to 502(e)(1)(B) of the Code. The Private Party Claims—relying either implicitly or explicitly on CERCLA sections 107(a) and 113(f)(1)—sought hundreds of millions of dollars for both past and future cleanup costs.

The Debtors’ objections to the Private Party Claims “do[] not relate to any past costs actually spent by these claimants.”⁷ But the Debtors argue that the Private Party Claims must be disallowed under 502(e)(1)(B) of the Bankruptcy Code to the extent they seek payment of *future* cleanup costs, because such claims are: (1) for reimbursement or contribution, (2) based on the claimant’s co-liability with the Debtors to a federal or state environmental agency, and (3) contingent.

No responses were submitted by the claimants for 23 of those objections, and those 23 claims were either resolved by stipulation and order⁸ or disallowed by orders of this Court either (a) in their entirety or (b) to the extent that they sought future costs.⁹ One claim—that of Agrico Chemical Company—was expunged as late-filed under section 502(b) of the Code. Objections to 32 claims went forward on a contested basis at a hearing on the objections.¹⁰ Since the hearing, one claim has been resolved by stipulation and order,¹¹ and the Debtors have reached settlements, in principle but without documentation, with regard to two others.¹² This

⁷ See 8/4/2010 Hr’g Tr. at 119.

⁸ Claims filed by Sensient were resolved by stipulation and order on the date of the hearing. See ECF #3486.

⁹ See Appendix A.

¹⁰ Three contested claims (those of Maxus Energy Corp., Tierra Solutions Inc., and Stony Creek Technologies LLC) weren’t addressed at the argument on these issues by reason of pending settlement negotiations: Accordingly, this decision doesn’t apply to those claims for the purpose of disallowance, *res judicata* or collateral estoppel. Of course, it does have *stare decisis*, or precedential, significance if settlements are not finalized.

¹¹ The claim of Akzo Nobel Chemicals, Inc. was resolved by stipulation and order disallowing the claim to the extent the claim sought future environmental costs, and establishing an allowed claim for costs already incurred. See ECF #4269.

¹² The Debtors reached a settlement in principle, but without documentation, with respect to the claims of Flabeg Technical Glass US Corp. Accordingly, this decision doesn’t apply to those claims for the purpose of disallowance, *res judicata* or collateral estoppel. Of course, it does have *stare decisis*, or precedential, significance if either side justifiably fails to proceed with the settlement.

decision applies to the remaining 29 section 502(e)(1)(B) objections to claims of Private Party Claimants.¹³

The 29 Private Party Claims at issue here were filed on the basis of the Debtors' alleged liabilities at certain environmental sites. With respect to each of these claims, overlapping claims, in terms of the underlying environmental site, were filed by the U.S., Connecticut, California, or Texas. And as mentioned above, all of those governmental claims were since resolved by settlement.

I lay out the facts as to the 29 Claims at issue by Private Party Claimant or group of Claimants, and have organized them based on similar factual positions.

A. Claims for Remediation Pursuant to a Consent Decree or Intent to Comply to which a Debtor Was Not a Party

Some of the Claimants are private entities that agreed to provide and fund remediation at certain environmental sites by either (a) submitting statements of "intent to comply" with "Unilateral Administrative Orders" or "Administrative Orders on Consent" issued by state or federal environmental agencies or (b) entering into consent decrees with state or federal environmental agencies. None of the Debtors was a party to these consent decrees or a signatory to these statements of intent to comply. The Claimants assert that they are entitled to payment from the Debtors for costs they are incurring because, under CERCLA or other environmental law, the Debtors are responsible for remediation at these sites.

(1) BKK Joint Defense Group

The BKK Joint Defense Group filed claims against certain of the Debtors for past and future remediation costs associated with the BKK Class I Landfill in California, which is a waste

¹³ See Appendix B. The Debtors are in settlement negotiations with some of these claimants, but only in connection with the non-502(e) portions of their claims. Therefore, those settlements, even if ultimately approved by the Court, are irrelevant to this decision.

landfill and associated treatment and control facility currently owned and operated by the BKK Corporation. California's Department of Toxic Substances Control issued an "Imminent and Substantial Endangerment Order" to several entities, excluding the Debtors, which led to consent decrees between members of the BKK Joint Defense Group and California. Members of the BKK Joint Defense Group have performed and will continue to perform operation, maintenance, and monitoring activities at the BKK site, and have paid and will continue to pay for California's costs in overseeing the remediation activities at the facility.

Although none of the Debtors was issued an order by California with respect to the BKK Site (or entered into a consent decree with California with respect to it), the BKK Joint Defense Group contends that certain of the Debtors are potentially responsible parties under CERCLA and/or other state or federal environmental laws because of their status as prior owners or operators of the BKK facility, or because those Debtors arranged for the disposal of materials at the facility. Future costs to remediate the Site are estimated by California to be in excess of \$600 million.

(2) BASF Sparks

In 2000, the EPA placed the Landia Site in Florida on the Superfund List, conducted a Remedial Investigation and Feasibility Study ("RI/FS"), and later approved RI/FS Reports for the Site.

In 2007, the EPA executed a final Record of Decision, which provided for the plan of remedial action to be implemented at the Landia Site. In 2008, the EPA sent "Special Notice" letters to a Debtor, BASF, and other parties notifying them of their status as PRPs that were responsible for the costs of cleaning up that site.

In response to the Letters, BASF and other private entities—not including any of the Debtors—entered into a consent decree with the EPA pursuant to which they agreed to pay for

the cleanup work. Since that consent decree became effective in 2009, BASF and the other parties to the consent decree have paid environmental consultants to perform and oversee the requisite remedial work. BASF filed a claim against the Debtors seeking payment for its share of these past costs, and for costs of cleanup that BASF will incur in the future under the consent decree.

(3) Cooper Drum Cooperating Parties Group

The Cooper Drum Cooperating Parties Group (“**Cooper Drum Group**”) filed a claim against the Debtors for costs incurred in the remediation of a former drum recycling facility in California.

In 2008, the EPA issued “Special Notice” letters identifying various entities, including one or more of the Debtors, as PRPs under CERCLA and/or other state and federal environmental laws. In 2009, the EPA issued a Unilateral Administrative Order to 43 potentially responsible parties, including the members of the Cooper Drum Group and Chemtura, requiring the recipients to conduct the remedy identified in an EPA Record of Decision. Later in 2009, the Cooper Drum Group submitted a letter to the EPA indicating its intent to comply with that order, and has since been performing its obligations under it.

None of the Debtors identified as PRPs has participated in any of these efforts at the Cooper Drum Site. The Cooper Drum Group asserts that past recoverable costs, including EPA oversight costs, exceed \$12 million, and that future recoverable costs will exceed \$25 million.

(4) Malone Cooperating Parties Group

In 2003, members of the Malone Cooperating Parties Group (“**Malone Group**”) entered into an Administrative Order on Consent with the EPA for, among other things, the performance of a RI/FS at the Malone Service Company Superfund Site in Texas. The Malone Group

completed the RI/FS in 2008 and is continuing to take other actions at the site pursuant to the Administrative Order on Consent.

In 2009, the EPA issued a proposed plan for remedial action, which estimates that the total costs of the remedy will be \$54.6 million, not including future EPA oversight costs, natural resource damage claims, and past EPA response costs. The Malone Group members plan to enter into a consent decree with the U.S. for the performance of the remedial action at the site, and they assert that they will pay at least a portion of the EPA's past and future response costs.

The Malone Group filed a claim for unpaid response and other costs "in an amount estimated to equal or exceed \$109,000." Using the EPA's calculation of the percentage of waste by volume sent to the site by the Debtors, and the EPA's estimated costs of remediation pursuant to the plan, the Malone Group asserts that Debtors are responsible for approximately \$109,000 for future response costs. The Malone Group also alleges that the Debtors are liable for a share of additional costs, including future EPA oversight costs and future natural resource damage claims.

B. Claims arising from Debtors' consent decree and allocation agreement with Claimants

Some of the Claimants are private entities (or groups of private entities) that both

(a) entered into a consent decree with a Debtor and state or federal environmental agency to perform or pay for environmental remediation and

(b) subsequently entered into a contract with a Debtor to allocate responsibilities for coordination of work and funding of response costs required by the consent decree.

(1) *Interstate Lead Company (“ILCO”) Site Remediation Group*

Witco Corporation (a predecessor to Chemtura) and members of the ILCO Site Remediation Group (with Witco, the “**ILCO Settling Defendants**”) entered into a consent decree with the EPA in 1997, which required each Settling Defendant to finance and perform remediation of the ILCO Superfund Site and related areas in Alabama, with EPA oversight.

To organize the implementation and funding of this remediation, the Settling Defendants, including Witco, entered into a remediation contract. That contract included a formula for determining each party’s share of costs for the remediation, and using this formula, periodic assessments were made and allocated to each of the parties.

Consultants hired by the ILCO Remediation Group estimate future response costs to be over \$31 million. Pursuant to the contractual formula, the Debtors’ share of those future costs would be \$732,973.

(2) *Beacon Heights Coalition and Goodrich Corp./Coltec Inc.*

Members of the Beacon Heights Coalition and the Debtors entered into a consent decree with the EPA in 1987, which provided that the members of that coalition (including the Debtors) would jointly and severally finance and perform remedial action, including operation and maintenance, at the Beacon Heights Landfill in Connecticut—and that in the event of insolvency of one of the members, the remaining members of the coalition would complete the remediation.

To comply with the provisions of that consent decree, and to provide for an equitable apportionment of their obligations, the members of the coalition, including the Debtor, entered into a sharing agreement in 1986. The Debtors’ apportioned liability pursuant to that sharing agreement is 42%.

In addition to filing claims for over \$100,000 in *past* costs incurred by the coalition members, the coalition and certain of its members also asserted claims against the Debtors for

the Debtors' allocated share of *future* operation, maintenance, cleanup, and other costs. The Coalition estimates that total Site costs are projected to be over \$16 million, with the Debtors' share of these future costs at nearly \$7 million.

(3) *Lower Passaic River Study Area Cooperating Parties Group, and certain of its members (Ashland Inc., Givaudan Fragrances Corp., Mallinckrodt Inc.)*

The EPA issued "General Notice" letters to Chemtura and other entities notifying them of their potential liability for environmental study expenses and response actions at the "Lower Passaic River Study Area" portion of the Diamond Alkali Superfund Site in New Jersey. The Lower Passaic River Study Area Cooperating Parties Group ("**LPRSA Group**") was formed to respond to the EPA, and in 2004, certain LPRSA Group members, including Chemtura, entered into a settlement agreement with the EPA through which they contractually agreed to pay a fixed sum to the EPA to fund a RI/FS at the site.

In 2007, the EPA entered into another settlement agreement with certain LPRSA Group members, including Chemtura (the "**RI/FS Settlement Agreement**" and "**RI/FS Agreement Settlers**"), which contractually obligated those parties to, among other things,

(a) implement and perform certain RI/FS tasks,

(b) make a \$700,000 initial payment to the EPA,

(c) establish and maintain a trust fund in the initial amount of

\$37.45 million to ensure funds are available to perform the RI/FS work, and

(d) pay all EPA oversight costs.

The LPRSA Group and certain of its members assert that the Debtors are contractually obligated to pay an allocated share of the expenses pursuant to an agreement among the Debtors and other RI/FS Agreement Settlers. The LPRSA Group has filed claims against the Debtors for Chemtura's allocated share of:

- (a) \$9.45 million payment to the RI/FS trust fund,
- (b) \$512,427 in EPA oversight costs,
- (c) continuing EPA oversight costs,
- (d) any changes in cost related to the RI/FS, and
- (e) other administrative project costs.

(4) *Laurel Park Coalition and certain of its members (Cadbury Beverages Inc., CR USA Inc., Kerite Company, Unisys Corp.)*

In 1992, the Debtors and other PRPs (also members of the Laurel Park Coalition) entered into a consent decree with the EPA which provided that the PRPs would jointly and severally finance and perform remedial action, operations, and maintenance at the Laurel Park Landfill in Connecticut.

Members of the Laurel Park Coalition, including the Debtors, entered into a sharing agreement in 1991 to secure equitable participation and funding for compliance with the consent decree. Under that sharing agreement, the Debtors' apportioned liability for the site is 86.24%.

The Laurel Park Coalition and certain of its members have filed claims against the Debtors seeking payment of the Debtors' allocated share of fixed costs incurred in the *past* by the Laurel Park Coalition's members since the Debtors filed for chapter 11 and then ceased contributing funds for ongoing cleanup operations. They also assert claims for the Debtors' share of *future* operations and maintenance costs, and any other liabilities at the Laurel Park Site, pursuant to the sharing agreement.

The Coalition estimates that the total future costs at the Laurel Park Site will be over \$7.7 million, and asserts that the Debtors are therefore liable for \$6.6 million of those costs.

(5) *Delaware Sand and Gravel Remedial Trust*

In 1981, the EPA designated the Delaware Sand & Gravel Landfill as a Superfund site, and in 1984, the EPA incurred removal costs at the Site. In 1990, Debtor Witco and other PRPs entered into a consent decree with the U.S., under which the defendants agreed to reimburse an aggregate \$600,000 of the EPA's 1984 removal costs.

One year later, in 1991, Witco and other PRPs entered into an agreement to allocate responsibility among the PRPs for the cost of remediating the site, which was later incorporated into a settlement agreement. That settlement agreement created a mechanism for reimbursing the EPA's response costs, and provided for the funding of the Delaware Sand & Gravel Remedial Trust (the "**DS&G Trust**") to pay for remedial work at the Site. Under that settlement agreement, Witco is responsible for 7.76% of the costs associated with remediating the Delaware Sand & Gravel Landfill site.

Witco and other PRPs also entered into another consent decree with the U.S., pursuant to which they agreed to reimburse the EPA for a portion of its response costs and to implement the remedial measures specified in an EPA "Record of Decision."

The DS&G Trust filed a proof of claim seeking over \$100,000 in past-due amounts, and for about \$470,000 of additional amounts that the Debtors had committed to pay for the future. Significantly (for reasons discussed below), these sums are said to be due to the DS&G Trust, and not to other PRPs who are likewise obligated to make payments into the DS&G Trust.

(6) *Givaudan Flavors Corporation*

One of the Debtors and other PRPs entered into a consent decree with the EPA in 2007 regarding the cleanup of the LWD Facility Site in Kentucky.

A group of these PRPs (the “**LWD PRP Group**”) filed claims against the Debtors. The Debtors objected to the LWD PRP Group’s claims on 502(e)(1)(B) grounds. After no responses to those objections were filed by the LWD PRP Group, I disallowed its claims.

But Givaudan filed a separate proof of claim against the Debtors for “the amount, as it ultimately may be determined, to which Givaudan is entitled from the Debtor based upon the Debtor’s liability as set forth in the proof of claim . . . filed in this case by the [LWD] PRP Group.”

C. Other claims

(1) Passaic Valley Sewerage Commission

The Passaic Valley Sewerage Commission filed a claim against Chemtura alleging that Chemtura is liable for unliquidated contribution claims related to the Diamond Alkali Site (discussed above)¹⁴ (and other environmental sites) for cleanup, investigation, and natural resource damage costs related to the environmental contamination. Its claim also asserted unliquidated contribution claims based on various agreements and orders.¹⁵

In December 2005, New Jersey brought an action against various parties for cleanup costs and damages relating to the environmental contamination of the Passaic River and surrounding areas at the Diamond Alkali Site. Some of the defendants in that action filed complaints against third-party defendants, including one of the Debtors and the Passaic Valley Sewerage Commission. The Passaic Valley Sewerage Commission’s claim seeks an

¹⁴ See page 10 above.

¹⁵ It isn’t clear from the proof of claim and response filed by Passaic Valley Sewerage Commission whether the Passaic Valley Sewerage Commission is a party to any of those agreements or orders.

indeterminate amount to the extent a Debtor¹⁶ or the Passaic Valley Sewerage Commission is or may be liable for contamination alleged in the third-party complaint.

(2) *Dow Chemical Company*

In 1998, California initiated litigation against six defendants, including Debtor Witco and Dow Chemical, for environmental damage at San Joaquin Drum Company Site in Bakersfield, California.

Witco and Dow Chemical agreed to work cooperatively with California to address the release of hazardous substances at the San Joaquin Drum Company Site, and entered into separate tolling agreements with California. As a result, in 2006, California dismissed the litigation against those two defendants without prejudice.

In 2008, the Debtors executed an agreement with California pursuant to which the Debtors agreed to remit certain costs and complete certain tasks with respect to the San Joaquin Drum Company Site. And in 2009, California approved a “Remedial Investigation Work Plan” proposed by the Debtors in accordance with that agreement. After the Debtors’ chapter 11 filing (and after California filed a claim for the San Joaquin Site in this case), Dow Chemical and California entered into an agreement pursuant to which Dow Chemical agreed to finalize and implement that work plan and pay California oversight costs, since the Debtors were no longer doing so.

Dow Chemical estimates that future costs in connection with that work plan will be approximately \$188,500; future costs necessary for complete remediation will be approximately \$268,000; and the cost of operating and maintain such measures over the next 20 years will total \$460,000. Dow Chemical filed a claim against the Debtors for these costs.

¹⁶ The Court has some difficulty seeing how a *Debtor’s* liability would be relevant (as contrasted to the claimant’s), but this is what the proof of claim says.

Discussion

All parties agree that section 502(e)(1)(B) of the Bankruptcy Code determines whether the Private Party Claims should be disallowed. As noted above, the Claimants argue, for various reasons, that their claims should not be disallowed because they fail to satisfy one or more of the elements of section 502(e)(1)(B), as laid out in the statute or the interpretive caselaw—that the claims be for reimbursement or contribution, that they be contingent, or be based on co-liability with the Debtors.

I.

The Statutory Environment

Though the Code doesn't define all of the terms that ultimately are important here, and many of the gaps have been filled by caselaw, I nevertheless start with textual analysis.¹⁷

Section 502(e) provides, in relevant part, that notwithstanding provisions of section 502 under which claims would otherwise be allowable:

(e)(1) ... the court shall disallow any claim for reimbursement or contribution of an entity that is liable with the debtor on ... the claim of a creditor, to the extent that—

...

(B) such claim for reimbursement or contribution is contingent as of the time of allowance or disallowance of such claim for reimbursement or contribution....

Thus, by section 502(e)(1)(B)'s terms, three elements must be met for a claim to be disallowed under section 502(e)(1)(B):

¹⁷

See, e.g., Alta Partners Holdings LDC v. Credit Suisse First Boston LLC (“*In re Global Crossing Ltd.*”), 385 B.R. 52, 66 (Bankr. S.D.N.Y. 2008); *In re General Motors Corp.*, 407 B.R. 463, 486 (Bankr. S.D.N.Y. 2009) (“**GM-Sale Decision**”), *appeal dismissed and aff'd*, 428 B.R. 43 (S.D.N.Y. 2010), and 430 B.R. 65 (S.D.N.Y. 2010); *In re Motors Liquidation Co.*, 438 B.R. 365, 372 (Bankr. S.D.N.Y. 2010); *In re Adelphia Communications Corp.*, --- B.R. ---, 2010 Bankr. LEXIS 3915, *12 & n.17, 2010 WL 4791795, *3 & n.17 (Bankr. S.D.N.Y. Nov. 18, 2010).

(1) the party asserting the claim must be liable with the debtor on the claim of a third party;

(2) the claim must be contingent at the time of its allowance or disallowance; and

(3) the claim must be for reimbursement or contribution.¹⁸

But textual analysis here is of limited utility. None of the terms or expressions “reimbursement,” “contribution,” “contingent” or “liable with the debtor” is defined in the Bankruptcy Code, nor does the Code articulate standards for their application.¹⁹ Thus a court construes section 502(e)(1)(B)’s requirements based on caselaw.

Section 502(e)(1)(B)’s requirements have been interpreted in a fair body of relevant caselaw, most of which has disallowed claims for contribution and indemnification by those who are liable, along with a debtor, to others for amounts to be determined only in the future—including a decision of mine a few months ago, where I sustained objections, on 502(e)(1)(B) grounds, to claims for contribution and/or indemnification for liability in connection with pending or threatened lawsuits by plaintiffs alleging injuries from exposure to the chemical Diacetyl, where the claimants, along with Chemtura, might be liable for the plaintiffs’ Diacetyl

¹⁸ See *In re Lyondell Chemical Co.*, --- B.R. ---, 2011 Bankr. LEXIS 10, 2011 WL 18975 (Bankr. S.D.N.Y. Jan. 4, 2011) (“*Lyondell*”). *Lyondell* dealt with claims that, with few exceptions, were identical to those here, and *Lyondell* (along with the earlier caselaw upon which it relied, much of which is controlling in its own right) is on point and controlling in most respects here. To balance needs to provide necessary context in this decision and to make it free-standing, to issue this decision as promptly as practicable, and to avoid making this decision unduly repetitive, this decision repeats more than a little, but less than all, of the analysis in *Lyondell*. Many elements of the discussion that follows will have obvious similarities to *Lyondell*, and the conclusions with respect to similar types of claims are of course identical.

¹⁹ It should be noted, however, while focusing on textual analysis, that section 502(e)(1)(B) imposes no requirements as to *how* or *why* the party asserting the claim potentially subject to section 502(e)(1)(B) must be liable with the debtor on the claim of the third party. There is no statutory requirement, for example, that the debtor and the party asserting the claim be liable on the claim of the third party in the same action, under a common statute, or on the same legal theory.

injury.²⁰ The issue here—whether a different rule should apply to claims by PRPs who, along with a Debtor, are liable for environmental remediation costs—requires consideration of the relevant environmental statutes, most significantly provisions in CERCLA.

Section 106 (captioned “Abatement Actions”) provides, its subsection (a):

In addition to any other action taken by a State or local government, when the President determines that there may be an imminent and substantial endangerment to the public health or welfare or the environment because of an actual or threatened release of a hazardous substance from a facility, he may require the Attorney General of the United States *to secure such relief as may be necessary to abate such danger or threat*, and the district court of the United States in the district in which the threat occurs shall have jurisdiction to grant such relief as the public interest and the equities of the case may require. The President may also, after notice to the affected State, take other action under this section including, but not limited to, issuing such orders as may be necessary to protect public health and welfare and the environment.²¹

Section 106’s subsection (b) then provides for fines for failure to comply with an order issued under subsection (a), and, for those who have received and complied with an order issued under subsection (a), reimbursement from the Hazardous Substance Superfund for the reasonable costs of such action.²²

Then, CERCLA Section 107 (captioned “Liability”) provides, in relevant part:

(a) ...Notwithstanding any other provision or rule of law, and subject only to the defenses set forth in subsection (b) of this section—

(1) the owner and operator of a vessel or a facility,

(2) any person who at the time of disposal of any hazardous substance owned or operated any facility

²⁰ See *In re Chemtura Corp.*, 436 B.R. 286 (Bankr. S.D.N.Y. 2010) (“*Chemtura-Diacetyl*”).

²¹ CERCLA § 106(a), 42 U.S.C. § 9606(a) (emphasis added).

²² See CERCLA § 106(b), 42 U.S.C. § 9606(b).

at which such hazardous substances were disposed of,

(3) any person who by contract, agreement, or otherwise arranged for disposal or treatment, or arranged with a transporter for transport for disposal or treatment, of hazardous substances owned or possessed by such person, by any other party or entity, at any facility or incineration vessel owned or operated by another party or entity and containing such hazardous substances, and

(4) any person who accepts or accepted any hazardous substances for transport to disposal or treatment facilities, incineration vessels or sites selected by such person, from which there is a release, or a threatened release which causes the incurrence of response costs, of a hazardous substance, shall be liable for—

(A) all costs of removal or remedial action incurred by the United States Government or a State or an Indian tribe not inconsistent with the national contingency plan;

(B) any other necessary costs of response incurred by any other person consistent with the national contingency plan;

(C) damages for injury to, destruction of, or loss of natural resources, including the reasonable costs of assessing such injury, destruction, or loss resulting from such a release; and

(D) the costs of any health assessment or health effects study carried out under [CERCLA section 104].²³

Thus, CERCLA section 107(a) imposes liability for environmental cleanup costs, natural resource damages, and certain other categories of recovery on PRPs—including, as relevant here, (1) the current “owner or operator” of a site contaminated with hazardous substances, and (2) any

²³ CERCLA § 107, 42 U.S.C. § 9607.

person who previously owned or operated a contaminated site at the time of a hazardous waste disposal.

Then, CERCLA Section 113 (captioned “Civil Proceedings”) provides in its subsection (f) (captioned “Contribution”), in relevant part:

(1) Contribution

Any person may seek contribution from any other person who is liable or potentially liable under [section 107(a)], during or following any civil action under [section 106] or under [section 107(a)]. Such claims shall be brought in accordance with this section and the Federal Rules of Civil Procedure, and shall be governed by Federal law. In resolving contribution claims, the court may allocate response costs among liable parties using such equitable factors as the court determines are appropriate. Nothing in this subsection shall diminish the right of any person to bring an action for contribution in the absence of a civil action under [section 106] or [section 107].

(2) Settlement

A person who has resolved its liability to the United States or a State in an administrative or judicially approved settlement shall not be liable for claims for contribution regarding matters addressed in the settlement. Such settlement does not discharge any of the other potentially liable persons unless its terms so provide, but it reduces the potential liability of the others by the amount of the settlement.

(3) Persons not party to settlement

(A) If the United States or a State has obtained less than complete relief from a person who has resolved its liability to the United States or the State in an administrative or judicially approved settlement, the United States or the State may bring an action against any person who has not so resolved its liability.

(B) A person who has resolved its liability to the United States or a State for some or all of a response action or for some or all of the costs of

such action in an administrative or judicially approved settlement may seek contribution from any person who is not party to a settlement referred to in paragraph (2).

(C) In any action under this paragraph, the rights of any person who has resolved its liability to the United States or a State shall be subordinate to the rights of the United States or the State. Any contribution action brought under this paragraph shall be governed by Federal law.²⁴

Thus 113(f)(1) provides that PRPs who fund response actions can seek contribution from other PRPs “during or following any civil action” instituted under CERCLA section 106 or 107. And CERCLA section 113(f)(3)(B) permits private parties to seek contribution after they settle their liability with the EPA or a state in an administrative or judicially approved settlement. Conversely, section 113(f)(2) protects PRPs who have settled from contribution claims by other PRPs.

II.

Satisfaction of Section 502(e)(1)(B) Elements

In *Lyondell*,²⁵ the debtors similarly objected to private party claims for future environmental remediation costs under section 502(e)(1)(B) of the Code, and in response, the claimants there made arguments nearly identical to those made by the Claimants here. This Decision relies heavily on reasoning set forth in my recent decision on these same issues in *Lyondell*, but of course I also address unique facts and arguments in this case.

As in *Lyondell*, because the various Claimants’ positions overlap to such significant degrees, and because they assert, in many respects, similar deficiencies with respect to

²⁴ CERCLA § 113(f), 42 U.S.C. § 9613(f).

²⁵ See n.18 above.

502(e)(1)(B)'s three elements, for purposes of analysis I group the objections by the 502(e)(1)(B) elements.

A.

“Contingency” Element

Several of the Claimants assert that their claims are not contingent because (a) they have been fixed by contracts, settlements, consent decrees, or administrative orders; or (b) the right to payment has accrued and is not dependent on a future event. As in *Lyondell*, I agree that claims for remediation costs already paid by the Claimants are no longer contingent. But I find that claims for *future* remediation costs, not already paid for, are contingent, and satisfy the “Contingency” Element of section 502(e)(1)(B) doctrine.

In another recent decision, the *Chemtura-Diacetyl* decision in these chapter 11 cases,²⁶ I ruled, among other things, that the claims then before me were contingent. There, as I’ve noted, five corporate entities had filed claims against the Debtors for contribution and/or indemnification with respect to amounts they might pay in the future in litigation against them. I found that except to the extent they sought contribution for amounts already paid to tort litigants, their claims were contingent.²⁷ While in some instances the potential for payment by some of the Claimants here is more advanced than it was in the *Diacetyl* situation, similar principles apply, and key facts remain the same. The most significant of these is that except for remedial action accomplished in the past, for which the right to reimbursement or contribution is

²⁶ See n.20 above, 436 B.R. at 286.

²⁷ See *Chemtura-Diacetyl*, 436 B.R. at 297.

unchallenged (more clearly than it was in *Lyondell*),²⁸ claimants here are similarly seeking reimbursement for amounts that have not yet been paid.

As discussed in *Lyondell*,²⁹ though neither is squarely on point, two decisions from the Second Circuit have discussed contingency in deciding whether or not a creditor held a “claim.”³⁰ In *Chateaugay*, the EPA argued that “it does not have a ‘claim’ within the meaning of the Bankruptcy Code . . . for reimbursement of CERCLA response costs until those costs have been incurred.”³¹ Therefore, the EPA argued, any future response costs that the EPA might incur would pass through the bankruptcy organization as non-discharged liabilities. The Second Circuit rejected this argument, holding that the future costs were pre-petition “claims.” The Circuit stated, as part of its rationale, that:

[T]he location of these sites, the determination of their coverage by CERCLA, and the incurring of response costs by the EPA are all steps that may fairly be viewed, in the regulatory context, as rendering the EPA’s claim “contingent,” rather than as placing it outside the Code’s definition of “claim.”³²

Similarly, in *Manville Forest*, the Second Circuit decided that a party’s liability constitutes a “claim” against the debtor, albeit contingent. It stated:

the fact that [claimant] Olin did not know the specific parameters of its liability does not place that liability outside of the definition of “claim” *but rather is precisely what made the claim contingent*. Under this specific combination of circumstances, we find that future environmental liability was actually or presumedly

²⁸ See n.7 above (“The Debtors’ objections to the Private Party Claims “do[] not relate to any past costs actually spent by these claimants.”).

²⁹ See --- B.R. at ---, 2011 Bankr. LEXIS at *25-*28, 2011 WL 18975 at *8-*9.

³⁰ See *In re Chateaugay Corp.*, 944 F.2d 997 (2d Cir. 1991) (“*Chateaugay*”); *Olin Corp. v. Riverwood Int’l Corp.* (“*In re Manville Forest Products Corp.*”), 209 F.3d 125 (2d Cir. 2000) (“*Manville Forest Products*”).

³¹ *Chateaugay*, 944 F.2d at 1000.

³² *Id.* at 1005.

contemplated by the parties upon their signing of the indemnification agreements and constitutes a valid *contingent claim*.³³

As noted in *Lyondell*,³⁴ I don't read *Chateaugay* and *Manville Forest Products*, neither of which is a 502(e)(1)(B) case, to go so far as to *hold* that a claim for reimbursement or contribution is contingent until an underlying payment (here, costs for remediation) is actually made.³⁵ But I do find it instructive that in both *Chateaugay* and *Manville Forest Products*, it was undisputed that the debtors faced *some* environmental liability, but the Second Circuit nevertheless described those claims as contingent because the scope, amount, and form of the environmental liability was undetermined.³⁶

But other authority, including my decision in *Lyondell*³⁷ and the authority upon which I there relied, including three decisions by other bankruptcy judges in this very district,³⁸ another

³³ *Manville Forest Products*, 209 F.3d at 129 (emphasis added).

Other caselaw—again in the context of determining the existence of a claim, rather than in deciding whether or not it was “contingent”—likewise describes a situation where the need for remediation is known, but the amount, if any, to be paid for the remediation is not, as giving rise to a “contingent claim.” See *Cal. Dep’t of Health Services v. Jensen* (“*In re Jensen*”), 995 F.2d 925, 931 (9th Cir. 1993) (*per curiam*) (“We conclude that the state had sufficient knowledge of the Jensens’ potential liability to give rise to a contingent claim for cleanup costs before the Jensens filed their personal bankruptcy petition on February 13, 1984”); *In re Chicago, Milwaukee, St. Paul & Pacific Railroad Co.*, 974 F.2d 775, 786 (7th Cir. 1992) (in context of a former Bankruptcy Act § 77 railroad reorganization, to same effect: “when a potential CERCLA claimant can tie the bankruptcy debtor to a known release of a hazardous substance which this potential claimant knows will lead to CERCLA response costs, and when this potential claimant has, in fact, conducted tests with regard to this contamination problem, then this potential claimant has, at least, a contingent CERCLA claim for purposes of Section 77.”).

³⁴ See --- B.R. at ---, 2011 Bankr. LEXIS 10 at *28; 2011 WL 18975 at *9.

³⁵ Somewhat earlier in the *Chateaugay* decision, also as part of its analysis as to whether the EPA had a claim at all, the Circuit dealt with the easy case. It stated, with respect to the EPA’s incurrence of CERCLA response costs:

When such costs are incurred, EPA will unquestionably have what can fairly be called a “right to payment.” That right is currently unmatured and will not mature until the response costs are incurred.

944 F.2d at 1004.

³⁶ See *Chateaugay*, 944 F.2d at 1005.

³⁷ See --- B.R. at ---, 2011 Bankr. LEXIS 10 at *29, *33-34, 2011 WL 18975 at *9, *10,

by a district judge in this district,³⁹ and another a thoughtful decision from Delaware⁴⁰—all 502(e)(1)(B) determinations—supports the conclusion that until and unless amounts *are actually paid*, the claims for reimbursement or contribution with respect to those amounts remain contingent for 502(e)(1)(B) purposes.⁴¹ For instance, in *Alper Holdings*, in this district, Judge Lifland disallowed claims for indemnification for future liability in environmental contamination litigation, finding that they were

properly categorized as “contingent as of the time of allowance or disallowance” as the amounts and ultimate liability are presently unknown.⁴²

³⁸ See *In re Alper Holdings USA*, No. 07-12148, 2008 WL 4186333, *6-*7 (Bankr. S.D.N.Y. Sept. 10, 2008) (Lifland, C.J.) (“*Alper Holdings*”) (disallowing future environmental indemnification costs “as the amounts and ultimate liability are presently unknown,” and finding contingency on the ground that amounts for which indemnification was sought were undetermined and unpaid); *In re Drexel Burnham Lambert Group, Inc.*, 148 B.R. 983, 986-90 (Bankr. S.D.N.Y. 1992) (Conrad, J.) (“*Drexel Burnham*”) (disallowing indemnity claims of co-underwriters for potential liability in pending fraud suits, because claimants had not yet paid judgments or settlements); *In re Wedtech Corp.*, 85 B.R. 285, 290 (Bankr. S.D.N.Y. 1998) (Buschman, J.) (“*Wedtech I*”) (disallowing debtor’s officers’ contingent indemnification claims).

³⁹ See *Aetna Casualty and Surety Company v. Georgia Tubing Corp.* (“*In re Georgia Tubing Corp.*”), No. 93 Civ. 3659, 1995 WL 429018, *3-*4 (S.D.N.Y. July 20, 1995) (Preska, C.J.), *aff’d*, 93 F.3d 56 (2d Cir. 1996) (disallowing an insurance company’s claim regarding hazardous waste bonds where primary creditor was a state environmental agency, stating that a surety claim was contingent until the claimant “pays the principal creditor and fixes his own right to payment from the debtor” (quoting 3 *Collier on Bankruptcy* ¶ 502.05 at 502-88 (15th ed. 1995))).

⁴⁰ See *In re APCO Liquidating Trust*, 370 B.R. 625 (Bankr. D. Del. 2007) (Shannon, J.) (“*APCO*”).

⁴¹ Similarly, *Collier* expressly identifies claims for contribution arising under CERCLA as examples of claims that are contingent. See 4 *Collier on Bankruptcy* ¶ 502.06[2][d] (16th ed. 2010). *Collier* provides:

In addition to codebtor situations created by contract, section 502(e)(1)(B) applies to disallow contingent reimbursement or contribution claims created by statute. For example, a claim for contribution arising under the Comprehensive Environmental Response, Compensation and Liability Act may be a contingent claim subject to disallowance under section 502(e)(1)(B). . . . In such a case, the government is the primary obligee that may seek satisfaction of its claim against the debtor from third parties who, under the statute, are obligated with the debtor to the government on the same debt. The statute under which the third-party liability is created, however, must provide for a reimbursement or contribution claim against the debtor.

(footnote omitted).

⁴² 2008 WL 4186333 at *6.

Likewise, in *Drexel Burnham*, in this district, it was observed that “[t]he Claimants’ claim is contingent until their liability is established *and the co-debtor has paid the creditor*. . . . One who is secondarily liable may only secure distribution rights by paying the amount owed the creditor.”⁴³

Similarly, in *APCO*, Judge Shannon disallowed a claim for the costs of remedial activities filed by the City of Wichita, which like the debtor there, was a PRP with respect to a site with groundwater contamination. Significantly, the City had agreed not just to perform a remedial investigation and feasibility study of the contaminated site; it had agreed to undertake the remedial activities identified in the study to clean up the site,⁴⁴ and had prevailed in a trial at which the *APCO* debtors were determined to be responsible for 1.72% of the City’s past and future costs for the remediation, and for 100% of the City future source control costs to be incurred at a different site,⁴⁵ securing a judgment for the future cleanup costs of which a portion was unpaid.⁴⁶

Among other things, Judge Shannon ruled that “because the City has not yet incurred any future source control costs” at one of the sites,⁴⁷ the claim was contingent, even though “the parties’ liability has been established.”⁴⁸ Quoting, among other decisions, *Drexel Burnham*, he observed that

The law is clear that “[t]he contingency contemplated by [section] 502(e)(1)(B) relates to both payment *and* liability.” ... Therefore, a claimant’s “claim is contingent

⁴³ 148 B.R. at 987 (emphasis added; internal citations omitted).

⁴⁴ See 370 B.R. at 629.

⁴⁵ *Id.*

⁴⁶ *Id.* at 630.

⁴⁷ *Id.* at 636.

⁴⁸ *Id.*

until their liability is established ... *and* the co-debtor has paid the creditor.”⁴⁹

I stated in *Lyondell*⁵⁰ and many times before it⁵¹ that that the interests of predictability in this district are of great importance, and that where there is no controlling Second Circuit authority, I follow the decisions of other bankruptcy judges in this district in the absence of clear error. But as I also stated in *Lyondell*,⁵² I believe that the conclusions in those cases were plainly correct. That is so because even though the need for remediation of the underlying environmental site might be obvious, the EPA or state environmental agency might have a multitude of different ways of getting the remediation done, and any one of those means might or might not call for—or result in—payment by the separate PRP that is asserting the claim against the debtor. And the PRP might or might not wind up actually making the payment for which it then would be seeking reimbursement or contribution.

Thus, as I held in *Lyondell*,⁵³ the fact that an EPA claim may have accrued against any of the Claimants does not mean that any of their separate claims against the Debtors are no longer contingent. We don’t know whether any of the Claimants will lay out the funds necessary to engage in the curative action, and, if so, to what extent.

Here, as in *Lyondell*, some of the Claimants argue that the Debtors are conflating contingency and liquidation. While I fully understand that “unliquidated” and “contingent” are

⁴⁹ *Id.* (emphasis in original; internal citations omitted).

⁵⁰ *See* --- B.R. at ---, 2011 Bankr. LEXIS 10 at *33, 2011 WL 18975 at *10.

⁵¹ *See, e.g., In re Adelphia Communications Corp.*, 359 B.R. 65, 72 n.13 (Bankr. S.D.N.Y. 2007) (“This Court has been on record for many years as having held that the interests of predictability in this District are of great importance, and that where there is no controlling Second Circuit authority, it follows the decisions of other bankruptcy judges in this district in the absence of clear error.”); *GM-Sale Decision*, 407 B.R. at 487 & n.19 (same).

⁵² *See* --- B.R. at ---, 2011 Bankr. LEXIS 10 at *33, 2011 WL 18975 at *10.

⁵³ *See id.* at ---, 2011 Bankr. LEXIS 10 at *34, 2011 WL 18975 at *10.

not the same thing⁵⁴ (and suspect that the Debtors do too), here I find that the claims at issue are *both*. The claims at issue here are for future cleanup costs that might or might not actually be incurred, and then might or might not actually be paid, by any of them.⁵⁵

Though I ultimately decide the issue on the statutory language and the caselaw, I note, as I did in *Lyondell*,⁵⁶ that this ruling advances not just bankruptcy policy, but environmental policy as well. Disallowance of reimbursement claims for amounts not yet paid by the claimant advances CERCLA's policy goal of encouraging expeditious cleanup, because claimants are encouraged to remediate promptly by the threat of disallowance of claims that have not been fixed.⁵⁷ As Judge Shannon observed in *APCO*:

It may appear that the Court's ruling is a harsh result for the City, and that may be true. Nevertheless, the Court's decision is mandated by the express language of the Code and is entirely consistent with the principles animating CERCLA. At bottom, CERCLA and similar state and federal environmental statutes create a scheme whereby parties are incentivized to promptly clean up contaminated sites. The prospect of the potential disallowance of

⁵⁴ See, e.g., *Chemtura-Diacetyl*, 436 B.R. at 297 (“Thus, while we all understand and agree that there is a distinction between “contingent” and unliquidated, that distinction isn’t material here. The unliquidated but non-contingent costs of defense here still result in a potentially allowable claim, but the claims for contribution in the event that a Tort Claimant succeeds against Corporate Claimants are still contingent, and satisfy this prong of the 3-part test for establishing 502(e)(1)(B) disallowance.”).

⁵⁵ Some of the claimants cite Judge Sontchi’s decision in *In re RNI Wind Down Corp.*, 369 B.R. 174 (Bankr. D. Del. 2007) (“*RNI*”) in support of this contention. But as I noted in my *Chemtura-Diacetyl* decision, see 436 B.R. at 296-97, the claimant in *RNI* waived any claims he might have for amounts he might have to pay on the underlying claims (there, by the SEC). The right to payment that Judge Sontchi found to be “unliquidated but not contingent” was the right to the *advancement of those costs of defense*, and not the right to *contribution or indemnity for amounts ultimately paid to a third party*—the circumstance that was relevant there and here. Judge Sontchi merely found (understandably, given appropriate analysis) that the right to advancement was a then-existing right (under the certificate of incorporation, bylaws, and Delaware law), subject only to uncertainty at the time as to just how much the defense costs would turn out to be. I observed, in fact, that Judge Sontchi had actually used claims for contribution as an example of what would satisfy the contingency elements. See *Chemtura-Diacetyl*, 436 B.R. at 297.

⁵⁶ See --- B.R. at ---, 2011 Bankr. LEXIS 10 at *37-*38, 2011 WL 18975 at *11.

⁵⁷ See *In re Eagle-Picher Indus. Inc.*, 164 B.R. 265, 272 (S.D. Ohio 1994) (“*Eagle-Picher*”) (“502(e)(1)(B) fosters the primary objective of CERCLA by requiring those who seek contribution to incur the expenses relating to cleanup before stating an allowable claim.”); *APCO*, 370 B.R. at 637 (same, quoting *Eagle-Picher*).

contingent contribution claims under section 502(e)(1)(B) offers a further incentive to undertake the cleanup: if the work is done (or at least underway), the contribution claim is not contingent as to amounts incurred by the contribution claimant. Thus, if the City had commenced or completed source control remediation at 1001 E. Lincoln in connection with its work on the G & M Site as a whole, the City's claim would be allowed to the extent of the amounts incurred.⁵⁸

Very few of the contentions made here raise issues not addressed in *Lyondell*. In one slight variant here, the Malone Cooperating Parties assert that their claim is non-contingent because the EPA has approved a remediation plan, with costs, and has apportioned liability. But the fact that the amount of future costs is known or fixed does not render the claim non-contingent where the costs have not yet been incurred and paid by the claimant.

As previously noted,⁵⁹ the Debtors here acknowledge, as they must, that *past* response costs previously paid are non-contingent. When they acknowledged that, the Debtors did not flesh out what they meant by that, or what kinds of past payments they would agree then qualify. Subject to rights to be heard, I would think that it's at least arguable that qualifying payments could be of many different types—including, by way of example, not just payments to the EPA, a state, or to a company hired to perform the cleanup, but also those made into a trust or a fund previously established for environmental remediation.⁶⁰ But if the Debtors contend otherwise, I'll hear more as to the facts concerning the trust and the payments that were made to it—such as the circumstances under which the trust or fund was established, its purpose, the use of any funds paid to it, and the extent, if any, to which any PRP could get money back from the trust. Plainly,

⁵⁸ 370 B.R. at 636-37.

⁵⁹ See n. 28 above.

⁶⁰ Allowing reimbursement for money paid into a trust or fund in accordance with a contractually established payment schedule, even though the money may not have actually been spent on cleanup yet, furthers environmental policy, as I discussed earlier, by incentivizing parties to make their payments as soon as possible.

however, I will not find on motion (and in the absence of an evidentiary hearing) that sums already paid by claimants in this case to such trusts or funds fail to qualify as sums paid in the past.

But with respect to payments the Claimants have not made yet, and that are only to be made in the future (if at all), I must and do find that the amounts are contingent, for the reasons stated above.

B.

“Co-Liability” Element

The Claimants also contend that the co-liability element has not been satisfied. For the most part, I must disagree. But with respect to the claim of the DS&G Trust, the co-liability element hasn’t been met, and I therefore rule that the DS&G Trust’s claim isn’t disallowable under section 502(e)(1)(B) grounds.⁶¹

1. The Atlantic Research Contentions

Some of the Claimants’ also argue that their claims aren’t premised on co-liability, because their claims are based on cost recovery under CERCLA section 107(a), and not contribution under section 113(f). In that connection, they note that in *U.S. v. Atlantic Research Corp.*,⁶² the Supreme Court held that a private party may recover under CERCLA section 107(a) without any establishment of liability to a third party. Because they are asserting section 107(a) claims, therefore, those claimants argue, the basis for finding co-liability is lacking.

But this reliance on *Atlantic Research* is flawed. The issue in *Atlantic Research*, a non-bankruptcy case, was whether a PRP could sue to recover voluntarily incurred cleanup costs

⁶¹ I don’t decide any other issues as to the DS&G Trust claim, as to which both sides’ rights will be reserved.

⁶² *U.S. v. Atlantic Research Corp.*, 551 U.S. 128 (2007) (“*Atlantic Research*”). Contrasting CERCLA section 107(a) with section 113(f), the Supreme Court stated the following: “§ 107(a) permits recovery of cleanup costs but does not create a right to contribution. A private party may recover under § 107(a) without any establishment of liability to a third party.” *Atlantic Research*, 551 U.S. at 139.

under section 107(a), rather than relying solely on section 113(f).⁶³ Section 107(a)(4)(A) expressly authorizes the federal government, the states, and Indian tribes to sue for cost recovery under section 107(a), and section 107(a)(4)(B) gives the same right to sue to “any other person.” Specifically, the Court was asked to determine whether a PRP is included in the phrase “any other person” in 107(a)(4)(B).

The Supreme Court held that the operator’s status as a PRP did not preclude the operator from suing under section 107(a), as section 107(a)(4)(B) covers any person not identified in subparagraph (A), and that a PRP was not limited to relief under section 113(f).⁶⁴ Nevertheless, the Supreme Court highlighted the “complementary yet distinct” nature of the rights established under section 107(a) and 113(f)—specifically, that a private party may sue under section 107(a) without any establishment of liability to a third party, something it could not do under section 113(f).⁶⁵ The Supreme Court allowed the claimant to recover from other PRPs costs that it had incurred by voluntary cleanup—or in other words, by cleanup or payments not prompted by a government action under sections 106 or 107.

On the issue of co-liability, the Claimants relying on *Atlantic Research* erroneously assume that only claims under section 113(f) are premised on co-liability with the defendant (in this case, a Debtor), and that cost recovery claims under section 107(a) are all direct claims, and not claims for either reimbursement or contribution. The *Atlantic Research* court held that a claim under section 107(a) *need not* be based on co-liability to a third-party (e.g. a governmental entity). But it did not hold that a claim under 107(a) *cannot* be based on co-liability. If a PRP undertakes “voluntary” clean up (as opposed to cleanup pursuant to government action under

⁶³ The PRP was the owner of the facility and filed a suit against the U.S. under CERCLA section 107 to recover cleanup costs.

⁶⁴ *Atlantic Research*, 551 U.S. at 135.

⁶⁵ *Id.* at 139.

section 106 or 107)—and sues under 107(a) to seek recovery for that cleanup from another PRP—that has no effect on, and certainly does not nullify, the fact that the two may still be co-liable to the Government.

Where a Debtor and a claimant have both been designated as PRPs by the EPA, they have a shared statutory obligation, under CERCLA, to provide for the cleanup of the environmental site, by one means or another. That a claimant might satisfy its own obligations by voluntary cleanup, rather than by waiting for a government action, is laudable, but not relevant to the 502(e)(1)(B) determination. The claims here are still expressly or impliedly premised on the theory that if any of the Debtors pay less than its share of cleanup costs, the claimant will have to pay more. That is the essence of co-liability.

2. *The Allegheny Contentions*

Some of the Claimants also assert that co-liability is lacking based on a district court decision in the *Allegheny* bankruptcy case.⁶⁶ In *Allegheny*, the owner of the site filed a claim for past and future response costs against a debtor that had sold the site to the claimant prior to filing for bankruptcy. Applying the three-part test described on page 16 above, the *Allegheny* court ruled that section 502(e)(1)(B) did not exclude the claimant's direct claims for future response costs under CERCLA section 107(a).⁶⁷ While the *Allegheny* debtor argued that there was a possibility that the creditor might never be required to expend any funds if the EPA were subsequently to order the debtor to perform the remediation, the *Allegheny* court reasoned that

⁶⁶ *In re Allegheny Int'l, Inc.*, 126 B.R. 919 (W.D. Pa. 1991), *aff'd without opinion*, 950 F.2d 721 (3d Cir. 1991) ("*Allegheny*").

⁶⁷ *See Allegheny*, 126 B.R. at 923.

this risk of double liability could be avoided by having the creditor's claim paid into a trust to be expended on remediation of the waste sites.⁶⁸

As in *Lyondell*,⁶⁹ I join the other courts that have disagreed with the *Allegheny* decision.⁷⁰

As noted in *Lyondell*,⁷¹ section 502(e)(1)(B) serves the important purpose of avoiding redundant recoveries.⁷² The situation here, where both Debtors and claimants are PRPs under CERCLA, state law, or both, presents precisely the danger of double recovery from the Debtors on account of the same liability, ultimately to the EPA and state authorities. Because the EPA and state environmental authorities already have allowed claims against Debtors for the all of the sites covered by the claims at issue here, allowing these Private Party Claims would be setting up precisely the redundant recoveries section 502(e)(1)(B) was created to prevent.

Indeed, the *Allegheny* court acknowledged that its decision not to disallow the claimant's claim under section 502(e)(1)(B) left the debtors vulnerable to multiple recoveries. What the *Allegheny* court failed to realized, however, is that this risk of duplicative recoveries arose *because* the debtors and claimant were co-liable.

For that reason, several cases have rejected *Allegheny's* logic.⁷³ In *Cottonwood Canyon*, for instance, the court stated that the fact that the *Allegheny* court found it necessary to establish

⁶⁸ See *id.* at 924.

⁶⁹ See --- B.R. at ---, 2011 Bankr. LEXIS 10 at *44, 2011 WL 18975 at *13.

⁷⁰ See *Eagle-Picher*, 164 B.R. at 271; *Drexel Burnham*, 148 B.R. at 988; *In re Cottonwood Canyon Land Co.*, 146 B.R. 992, 996 (Bankr. D. Colo. 1992) ("***Cottonwood Canyon***").

⁷¹ See --- B.R. at ---, 2011 Bankr. LEXIS 10 at *45, 2011 WL 18975 at *13.

⁷² See *APCO*, 370 B.R. at 634 ("[T]he sole purpose served by section 502(e)(1)(B) is to preclude redundant recoveries . . ."); *Wedtech I*, 85 B.R. at 289 & n.4 (noting that Congress enacted the provision, in part, to prevent competition between primary and secondary creditors for the "limited proceeds of the estate" (quoting H.R. Rep. No. 95 595, 95th Cong., 1st Sess. 354 (1977))).

⁷³ Some of the claimants also cite *In re Harvard Indus., Inc.*, 138 B.R. 10 (Bankr. D. Del. 1992) (Balick, J.) ("***Harvard Industries***"), which follows *Allegheny's* logic. In *Harvard Industries*, Judge Balick distinguished between claims by a PRP for a cleanup performed by the PRP and claims for where the EPA performed the cleanup, and ruled, *inter alia*, that where the party sought to recover funds it would expend in the future, section 502(e)(1)(B) does not apply. She acknowledged that double liability could occur if

a trust shows that the debtor and the claimant share a common liability against which the claimant sought to protect itself.⁷⁴ The *Cottonwood Canyon* court stated:

CSI argues that it is asserting a direct claim against Kaiser under Section [107(a)] and not a claim for reimbursement or contribution. It would clearly appear that a claim for reimbursement or contribution under either the California statute, CERCLA or the indemnification provisions of the contract is, by definition, a claim to recover costs incurred by reason of CSI's liability for cleanup as the "owner" of the site, which is the same liability Kaiser has for cleanup as the party which deposited the hazardous substances in the first instance. Such a claim would necessarily be one for liability for which both Kaiser and CSI are responsible and would fall within the ambit of 11 U.S.C. § 502(e).⁷⁵

Similarly, in *Eagle-Picher*,⁷⁶ the court rejected *Allegheny's* logic for similar reasons, and disallowed the creditors' reimbursement claims (which were under section 113(f)) for future response costs under CERCLA. The *Eagle-Picher* court stated that "[d]ouble liability could

the PRP recovered for personal expenditures but then failed to clean up the site and the EPA brought an action against the debtor, and, as in *Allegheny*, set up a trust to resolve that potential problem. But since, as in *Allegheny*, *Harvard Industries* subjects debtors to the risks of duplicative recoveries, I believe that *Harvard Industries* is subject to the same criticism that has been raised with respect to *Allegheny*.

⁷⁴ *Cottonwood Canyon*, 146 B.R. at 996. See also *Drexel Burnham*, 148 B.R. at 989 ("The *Cottonwood* court insisted that this is demonstrated by the solution devised by the *Allegheny* court in response to the concern that the allowance of the claim might lead to multiple recoveries against the debtor. The debtor would be subject to multiple recovery if the claimant failed to take remedial action to remove the hazard after it had received a distribution from the debtor, leaving the debtor liable to a claim by the Government for remediation of the plants."). The *Allegheny* court even noted that "both debtor and [claimant] are liable for the waste remediation . . ." *Allegheny*, 126 B.R. at 923.

⁷⁵ *Cottonwood Canyon*, 146 B.R. at 996.

⁷⁶ *Eagle-Picher* and *Cottonwood Canyon* are both pre-*Atlantic Research* cases. The *Eagle-Picher* court, citing circuit court decisions, found that the claims asserted there (a PRP against another PRP) could only be brought under CERCLA §113, and not §107. *Atlantic Research* did overrule *Eagle-Picher* in this respect—since *Atlantic Research* now allows a PRP to seek recovery from another PRP under §107. But that distinction does not matter here. I rely on *Eagle-Picher* for its narrower (and I believe undisputable) finding that the debtor and claimant were co-liable. Because the *Atlantic Research* decision did not reach that issue, the portion of *Eagle-Picher* upon which I rely was not overruled. And because *Atlantic Research* did not decide issues under Bankruptcy Code section 502(e)(1)(B), it had no effect on *Cottonwood Canyon*.

occur under the circumstances of this case since EPA remains free to pursue [the debtor] for remediation costs should the claimants fail to fulfill their cleanup obligations.”⁷⁷

Here, we have a situation similar to *Eagle-Picher*. The Debtors here do not dispute claims for costs the Claimants have already incurred from voluntary remediation; the claims at issue are for *future* remediation costs. The Private Party Claimants and the Debtors are both liable for cleanup at the same sites. And the EPA and state authorities have already entered into settlement agreements with the Debtors for remediation of every site for which a Private Party Claim was filed. Allowing the Private Party Claims would not only expose the Debtors to—but would actually result in—paying multiple recoveries on account of the same liability.⁷⁸

3. Other Contentions

A. Passaic Valley Sewerage Commission

The Passaic Valley Sewerage Commission argues that because the Debtors and the Passaic Valley Sewerage Commission both deny liability for contamination of the Newark Bay Complex, the Passaic Valley Sewerage Commission claim cannot be disallowed. But this argument—premised on a state of affairs that exists in many, if not most, instances in which multiple defendants are named in actions where one or more may turn out to be liable, on the one hand, or exonerated, on the other—is overly simplistic, and contrary to existing authority.

First, if the Passaic Valley Sewerage Commission turns out not to be liable, then the Passaic Valley Sewerage Commission would have nothing to claim against any of the Debtors in

⁷⁷ *Eagle-Picher*, 164 B.R. at 271.

⁷⁸ The fact that Debtors settled their claims with the EPA is not necessary to my decision here, though, it is worth noting that the contribution protection in the Settlement Agreement protects the Debtors from duplicative payments on account of the same liabilities, a risk that exists because the Debtors are co-liable with the Private Party Claimants.

the first place, as the Passaic Valley Sewerage Commission wouldn't be required to pay any money for remediation of the Newark Bay Complex.⁷⁹

Second, as explained in *Wedtech I*, the co-liability requirement doesn't require that the debtor and claimant have already been found liable in the underlying suit. Rather, "the co-liability requirement is to be interpreted to require a finding that the causes of action in the underlying lawsuit assert claims upon which, *if proven*, the debtor could be liable but for the automatic stay."⁸⁰ If the Passaic Valley Sewerage Commission were found to be liable, then paid remediation costs, and then sought to recover costs from the Debtors, that recovery action would be premised on the co-liability of the Debtors and the Passaic Valley Sewerage Commission. That is all that section 502(e)(1)(B) requires.

B. BKK

BKK similarly argues that because none of the Debtors is a party to BKK's consent decree with California, there is no co-liability to a primary creditor. Of course, the fact that none of the Debtors entered into the consent decree doesn't mean that none is liable to California; both Debtor entities and the BKK are PRPs under CERCLA.

More to the point, the environmental liability for which one or more of the Debtors and BKK are liable is one and the same, regardless of whether it is enforced by California (under California law) or the EPA (under CERCLA).

⁷⁹ This underscores, of course, the significance of the Contingency Element, discussed above.

⁸⁰ *Wedtech I*, 85 B.R. at 290 (emphasis added).

C. Dow Chemical

Dow Chemical argues that it is not co-liable with the Debtors because it is not liable for the San Joaquin Site at all, and is “voluntarily” undertaking and paying for an investigation of the Site.⁸¹

While it might ultimately turn out that Dow Chemical has no liability for the San Joaquin Site, there is now insufficient evidence in the record for me to issue rulings premised on the assumption that Dow Chemical is undertaking this investigation merely as a Good Samaritan—and I don’t need to rule on how I’d deal with a situation if a claimant ever turned out to be such. As Dow Chemical acknowledges in its papers, California initiated litigation against Dow Chemical in 1998, and California dismissed that litigation, without prejudice, only after Dow Chemical entered into tolling and other agreements with California. Even now, Dow Chemical is conducting an investigation of the Site pursuant to an agreement with California.

In addition, while Dow Chemical states that it is conducting only an investigation, Dow Chemical’s claim also seeks payment for future remediation costs. As I’ve repeatedly stated, the claims of Dow Chemical (and of all of the other Claimants) for past costs will not be disallowed under section 502(e)(1)(B). With respect to future costs, if it true that Dow Chemical has no liability for the site and any future acts would be undertaken solely as a Good Samaritan, then Dow Chemical can stop paying for the investigation at any time, and will thereby stop incurring costs for which it will be ineligible to receive reimbursement from the Debtors.⁸²

⁸¹ See 8/4/10 Hr’g Tr. at 156 (“We voluntarily undertook investigation with respect to our location, which is in Bakersfield, California, it’s the San Joaquin Dum Site. I mean, we claim and assert we have absolutely no liability. . . . We are voluntarily conducting an investigation only, and have agreed to do so because Chemtura did not fulfill their obligation by virtue of the bankruptcy to complete the investigation.”).

⁸² Dow Chemical also argues that California’s claim did not include the costs of operating and managing the remedial measures and therefore, part of Dow Chemical’s claim is not duplicative of the California claim. The content of the California claim or settlement agreement is irrelevant, because Dow Chemical’s claims, to the extent they seek repayment for future costs, fall squarely within 502(e)(1)(B). See *APCO*, 370 B.R. at 625 (“[T]he failure of KDHE to file a claim does not alter the co-liability of the Debtors and the City to

D. DS&G Trust

The claim filed by the DS&G Trust was filed by an entity that was supposed to *receive* payments for remediation, and not (as in the case of the Lower Passaic River Study Area Cooperating Parties), by others who might have to make contributions to a trust or fund. The DS&G Trust argues that because the trust itself faces no environmental liability, its claims cannot be disallowed as premised on “co-liability” with the Debtors. I agree.

Whether the DS&G Trust is regarded as a *collection agent* for the EPA, or the *mechanism* by which Chemtura itself was meeting its obligations to the EPA, its role is still as a recipient of payments for remediation—rather than as an obligor, much less a co-obligor. With respect to the DS&G Trust, the Co-liability Element is not satisfied.⁸³ I therefore decline to disallow its claim on section 502(e)(1)(B) grounds.⁸⁴

C.

“Reimbursement or Contribution” Element

Some of the Claimants also contend that because their claims are for cost recovery under section 107(a), rather than for contribution under section 113(f), their claims are not for “reimbursement or contribution” under section 502(e)(1)(B). But whether the claims are for cost recovery under section 107(a), or contribution under 113(f)(1), I must find that they still are covered by section 502(e)(1)(B).

KDHE. As other courts have observed, “section 502(e) does not require that a proof of claim be filed in the proceeding to be liable with the debtor. Application of [section 502(e)(1)(B)] ‘is not premised on the actual filing of multiple claims but, rather, on the existence of such claims.’” (quoting *In re Lull Corp.*, 162 B.R. 234, 238 (Bankr. D. Minn. 1993); *Cottonwood Canyon*, 146 B.R. at 997)).

⁸³ The Debtors argue that “the Trust cannot assert a claim on behalf of its members while simultaneously using its institutional identity to short-circuit consideration of whether this claim is actually allowable under section 502(e)(1)(b).” This argument confuses the beneficiaries of the trust. No evidence was submitted that the DS&G Trust is for the benefit of its “members.” To the extent there was any evidence, it suggested that the DS&G Trust was created for the benefit of the EPA, and/or the necessary remediation effort.

⁸⁴ I once more do not now decide whether this claim is disallowable for other reasons.

CERCLA section 113(f), by its terms, directly provides for “contribution”; therefore, quite indisputably, any recovery under section 113 must be considered contribution for the purposes of 502(e)(1)(B). Section 107(a), under which many of the Claimants assert that their claims are brought, provides for “recoverable costs,” but does not contain the words “contribution” or “reimbursement.” But as in *Lyondell*,⁸⁵ I don’t find this distinction to be dispositive, and I find that the claims at issue here, even if premised on section 107(a), are in substance still claims for “reimbursement” for the purposes of 502(e)(1)(B).

Section 502(e)(1)(B) states that “the court shall disallow *any* claim for reimbursement or contribution . . .”⁸⁶ As I noted above,⁸⁷ section 502(e)(1)(B) imposes no requirements as to the means or reason by which co-liability exists. Although “reimbursement” is not defined in the Bankruptcy Code, Black’s Law Dictionary defines “reimbursement” as “1. Repayment. 2. Indemnification.”⁸⁸ In *Wedtech II*, Chief Judge Brozman, in this district, explained that “[t]he use of the word ‘reimbursement’ in the statute cannot be viewed as accidental. It is a broad word which encompasses whatever claims a co-debtor has which entitle him to be made whole for monies he has expended on account of a debt for which he and the debtor are both liable.”⁸⁹

Similarly, in the *Chemtura-Diacetyl* decision, wherein I rejected the notion that the “liable with” prong requires that the Debtors establish that “the successful prosecution of a claim of [a Tort Plaintiff] against [a Corporate Claimant] would *automatically* result in the Debtors being liable to such underlying tort plaintiff as well,”⁹⁰ I noted that Congress clearly meant to

⁸⁵ --- B.R. at ---, 2011 Bankr. LEXIS 10 at *54, 2011 WL 18975 at *15.

⁸⁶ 11 U.S.C. § 502(e)(1)(B) (emphasis added).

⁸⁷ See n.19 above.

⁸⁸ *Black’s Law Dictionary* 1399 (9th ed. 2009).

⁸⁹ *In re Wedtech*, 87 B.R. 279, 287 (Bankr. S.D.N.Y. 1988) (Brozman, C.J.) (“*Wedtech II*”).

⁹⁰ *Chemtura-Diacetyl*, 436 B.R. at 293.

include all situations wherein indemnitors or contributors could be liable with the debtor within the scope of § 502(e)(1)(B).⁹¹

Other courts similarly focused on substance over form when addressing this issue, and I find their reasoning and conclusions to be persuasive. In *Cottonwood Canyon*, discussed above, the court disallowed, as “contribution or reimbursement,” claims asserted under CERCLA 107(a). The risk, both there and in *Allegheny*, that the Debtors would make duplicative payments for the same liability, revealed that “the clear character of the claim” was that “debtor was not being asked to satisfy a [direct] claim for injury to the claimants property” but rather was being sought for reimbursement.⁹²

Looking at substance over form here, the claims at issue plainly are for “reimbursement” as that term is used in section 502(e)(1)(B). The Claimants seek repayment of money that they allege that they will spend on environmental remediation, and the Debtors and the Claimants, all PRPs, are co-liable for environmental cleanup. There is a substantial risk that if these private party claims are allowed, the Debtors will pay twice for the same liability. In light of these facts, these claims, even if brought for cost recovery under section 107(a), are claims for reimbursement under 501(e)(1)(B).

Some Claimants argue that if this Court were to create a trust account for payment of future costs like in *Allegheny*, the payment of funds into the trust account could be considered something other than reimbursement, because the money wouldn’t be spent until the future.⁹³ I find this argument unpersuasive. The money would be paid to return money expended by the Claimants. That is reimbursement.

⁹¹ See *id.* at 295-96.

⁹² *Cottonwood Canyon*, 146 B.R. at 996.

⁹³ See 8/4/2010 Hr’g Tr. at 149:10-12.

Certain Claimants, such as the LPRSA Group members, entered into agreements with the Debtors to make payments proportional to their liability into a trust fund, out of which the money would then be used to pay for remediation. These Claimants maintain that their claims are direct contractual claims, and not for contribution. But contractual claims are similarly disallowed under 502(e)(1)(B) when they are, in substance, claims for reimbursement or contribution.⁹⁴ The Claimants assert that they will be forced to pay more than their fair share of the cleanup costs (or more than their fair share of money into the trust), and therefore, seek payment for cleanup costs that might be incurred in the future. But these are in substance claims for contribution. The trust into which the contributions will be made is merely the mechanism for their contributions.

Conclusion

For the foregoing reasons, I conclude that claims before me here (other than that of the DS&G Trust), to the extent they are on account of future costs, are contingent claims for reimbursement or contribution of an entity that is liable with the debtor to a third party creditor. Except for the amounts that the Claimants already actually paid, and the claim of the DS&G Trust, the Debtors' objections to the claims listed on Appendix B are sustained.
